Mechanisms of Defense-Freudian Psychodynamic Theory Repression: Blocking a threatening idea, memory, or emotion from consciousness. Projection: Attributing one's own unacceptable feelings and impulses to someone else. Displacement: Directing one's emotions, especially anger, toward things, animals, or other people that are not the real object of one's feelings.

Defense Mechanisms Worksheet Page 4 of 5 Optional Activity: Cut out the table below and write the correct answer on the back to use as flashcards! Nicholas lost his track race and said, "I would have won the race but the track was wet." Bill blames the instructor for a bad grade when he didn't study. Otto wins the lottery. He turns

The Defense Mechanisms Worksheet By Peggy L. Ferguson, Ph.D. Using the descriptions of defense mechanisms given in the *Defense Mechanism in Alcoholism/Addiction PDF*, give examples of how you used these defenses to avoid dealing with the reality of your circumstances and to persist in your unhealthy behavior.

DEFENSE MECHANISMS Defense Mechanisms, especially DENIAL th at there is a problem at all, are all too common in addiction. In your notebook, describe how you have used the following defenses and give THREE detailed and thorough examples of each: 1. DENYING: We act as if there is no problem at all; the problem lies outside of our conscious

The Defense Mechanism Manual The *Defense Mechanism Manual* was developed to assess the use of three 13G, 13MF, 14, 15, 17BM, 18GF, 20, and the research Trapeze card. The scoring for each defense is based on seven categories, each designed to reflect a defense mechanisms will help in answering these questions. Beyond this, the general rule

15 Common Defense Mechanisms 14. Compensation Compensation is a process of psychologically counterbalancing perceived weaknesses by emphasizing strength in defense mechanisms that may be more beneficial to you in your life. Many psychotherapists will help you work on.

defense of denial, and that projection is based on more complex (mature) operations. Identification has not been included in these analyses. By defining defense mechanisms as cognitive operations that occur outside of awareness, Pillar II avoids a controversial issue -- namely, that defense mechanisms are unconscious mental processes.

TABLE 1.2 Defense Mechanisms Defense Mechanism Example(s) Use/Purpose Compensation Covering up weaknesses by emphasizing a more desirable trait or by overachievement in a more comfortable area A high school student too small to play football becomes the star long distance runner for the track team. Allows a person to overcome weakness and

ago to describe a construct of psychological mechanisms for coping with intrapsychic conflicts. •Defense mechanisms and conflicts are two hypothetical constructs that have remained at the core of psychodynamic approaches to understanding and treating clinical psychopathology. •Defense mechanisms mediate between an individual's
